1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 to 4 and 9 to 16, drawn to a coating composition, classified in class 525, subclass 100.
  - II. Claims 5 to 8, drawn to a process, classified in class 524, subclass 731.The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another and materially different process, such as a process in which the alkoxysilyl functional acrylic polymer is prepared and then admixed with the polysiloxane.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

2. A telephone call was made to David Vickrey on Sept. 23, 2002, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
